Application brochure

Onboard weighing for farming

Tractors and compact loaders

INCREASE EFFICIENCY, DRIVE PRODUCTIVITY

When efficiency and productivity are important it is essential that you make good use of the products you buy and sell.

LOADRITE scales allow you to take control of aspects of your farm that previously have been out of reach. Weigh without needing to leave your cab. LOADRITE scales can be installed on a wide range of both tractors and wheel loaders to help you.

No matter the farming application, if you can benefit from accurate weighing in your tractor or loader then LOADRITE have a scale for you. Weighing to within 1% accuracy you can take control over previously unknown elements.

“The difference between 600 kgs and 700 kgs in a bucket may not look like much but cost wise is a big difference over time” says Mike Davie, a dairy farmer from New Zealand.

This also allows for any incoming or outgoing product to be weighed as it's loaded to ensure accuracy of billing.

Knowing this weight allows you to manage stocks through the season by monitoring total stock on hand against any taken out.

- Weigh to within 1% accuracy to prevent wasted feed and products
- Accurately measure feed to prevent over/under feeding and maximise animal weight
- Increase output of products through effective use of fertilisers
- Manage stock on-hand

WHY WEIGH?

“I was shocked to see I was giving away almost \$9,000 per year just by overloading of trucks”

Chris Petty , cattle feed lot owner, Iowa, USA

Improve profits

- Prevent under/over feeding to maximize stock weights
- Accurately weigh outgoing products
- Eliminate wasted fertilizers and feed

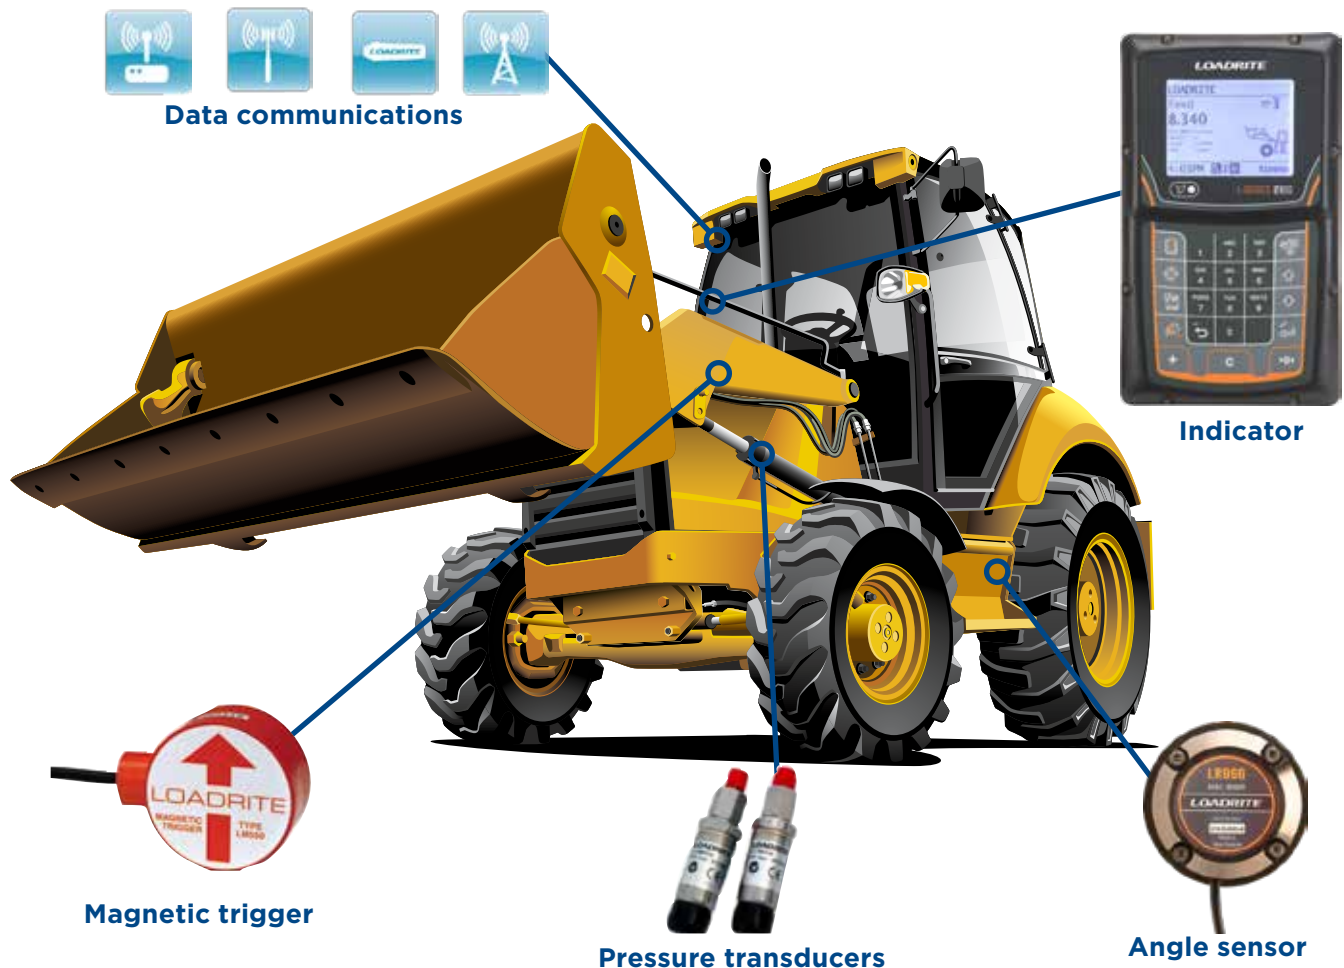

Increase productivity

- Accurate weighing first time
- Measure and manage supplementary feed
- Track and change individual paddock feed weights
- Manage stock on hand
- Identify wet hay bales early
- Decrease feed prep time

Process improvement

- Monitor and track total weights across your farm
- Manage feed weights to ensure stocks do not run out early
- Simple and easy to use for all farm staff

How it works

WEIGHING ON YOUR MACHINE

Machines

The LOADRITE range is designed to work on a wide range of models, brands and sizes of forklifts, compact loaders, and other small lifting machines.

Small tractors

Large tractors

Wheel loaders

“The big advantage of the LOADRITE system is being able to consistently measure the feed that our cows are receiving.”

Russell Foote, farm owner, Victoria, Australia

Other products from LOADRITE

Wheel loader scales

Fixed belt scales

Mobile belt scales

Excavator scales

Reporting

Choose LOADRITE

- World-leading onboard weighing manufacturers since 1979
- Equipment sold in over 50 countries, into the most rugged of industries
- Reputation for superior accuracy and product reliability
- Manufactured under strict ISO9001 international quality systems
- Complete service provider through our fully-authorised and certified global-distribution network
